

Graphic Designer

Job Offer

The Company

3Brain is a Swiss deep tech company working on cell-electronic interfaces that link biological networks to computers via custom-made semiconductor microchips. Our mission is to empower life scientists to probe intelligent networks, accelerate biomedical discoveries for the benefit of patients, and create a future more exciting than the present. Our interdisciplinary team of scientists and engineers are constantly pushing the boundaries of engineering for life's complexities. We are ambitious, fast-growing and love to explore. The company's cutting-edge products are used in laboratories and pharma companies worldwide. 3Brain is headquartered in Switzerland nearby Zurich, has a Data Science and Discovery Unit in Genova, Italy, and an operational unit in the US.

Job description

3Brain is looking for a full-time Graphic Designer for its Swiss office with proven experience in both digital and print media. This is a mid-level position within the marketing department, with creative ownership over the company's visual communication. The role involves close collaboration with the marketing, software, customer success, and sales teams to ensure brand consistency and support strategic initiatives. It also requires hands-on execution of a wide range of design projects, including video editing, print materials, technical document layout, and presentation design. Main responsibilities:

- Create and deliver high-quality visual content across digital and print channels - including brochures, posters, event materials, booth graphics, social media assets, and presentations - ensuring timely execution across multiple campaigns.
- Develop and maintain 3Brain's visual identity by designing brand assets, templates, and style guidelines, and ensuring their consistent application across all internal and external communications
- Manage multiple design projects simultaneously, maintain organized files, and ensure timely delivery of assets for campaigns, events, and product launches.

- Conceptualize visual storytelling strategies that effectively communicate complex scientific and technical content.
- Translate complex scientific and technical concepts into clear, visually engaging graphics, infographics, and illustrations to support neuroscience-related marketing campaigns, product documentation, and educational materials.
- Support the creation of technical documents such as datasheets, application notes, and scientific posters, ensuring visual clarity, brand consistency, and professional layout.
- Support the visual design of product launches and trade show booths by adapting technical content for broader audiences without losing scientific accuracy.
- Create user-friendly visual documentation for lab users and researchers, including product setup guides, application notes, and tutorial visuals.
- Review, update, and maintain a library of reusable brand assets and templates to streamline content creation across departments.

Required Qualifications

- 5+ years of professional experience in graphic design, preferably in an in-house or agency setting
- Strong portfolio demonstrating expertise in both digital and print design
- Advanced proficiency in Adobe Creative Suite (Illustrator, Photoshop, InDesign, Premiere Pro, After Effects)
- Proficiency in Figma and Canva for creating and adapting layouts, templates, and collaborative design workflows
- Experience preparing print-ready files (CMYK, bleeds, resolution settings) and optimizing digital assets for web and mobile (e.g., file compression, responsive design principles)
- Experience in video editing for marketing, tutorials, and social media (short-form and long-form), with additional skills in photo editing and retouching
- Collaborative problem-solving ability, action-oriented and results-focused.
- Excellent English language skills.
- Applicant must have an EU/Swiss residence permit.

Additional Qualifications

- Prior experience in a tech, biotech, pharmaceutical, or scientific research environment
- Familiarity with scientific communication and the ability to visually translate complex data or concepts

What We Offer

- A dynamic and stimulating work environment driven by a desire to build transformational technologies to help others.
- A young, fast-growing company with plenty of opportunities for personal growth and development.
- Working place: **Pfäffikon SZ, Switzerland**. It's a beautiful lakeside village just outside of Zurich, the country's main cultural, financial and business center.

To apply send your CV and short motivation letter to hr@3brain.com, subject: **Graphic Designer**.
